Vision, Mission & Commitment

Vision :

Delivering knowledge superiority to the warfighter at the right time for the right cost.

Mission :

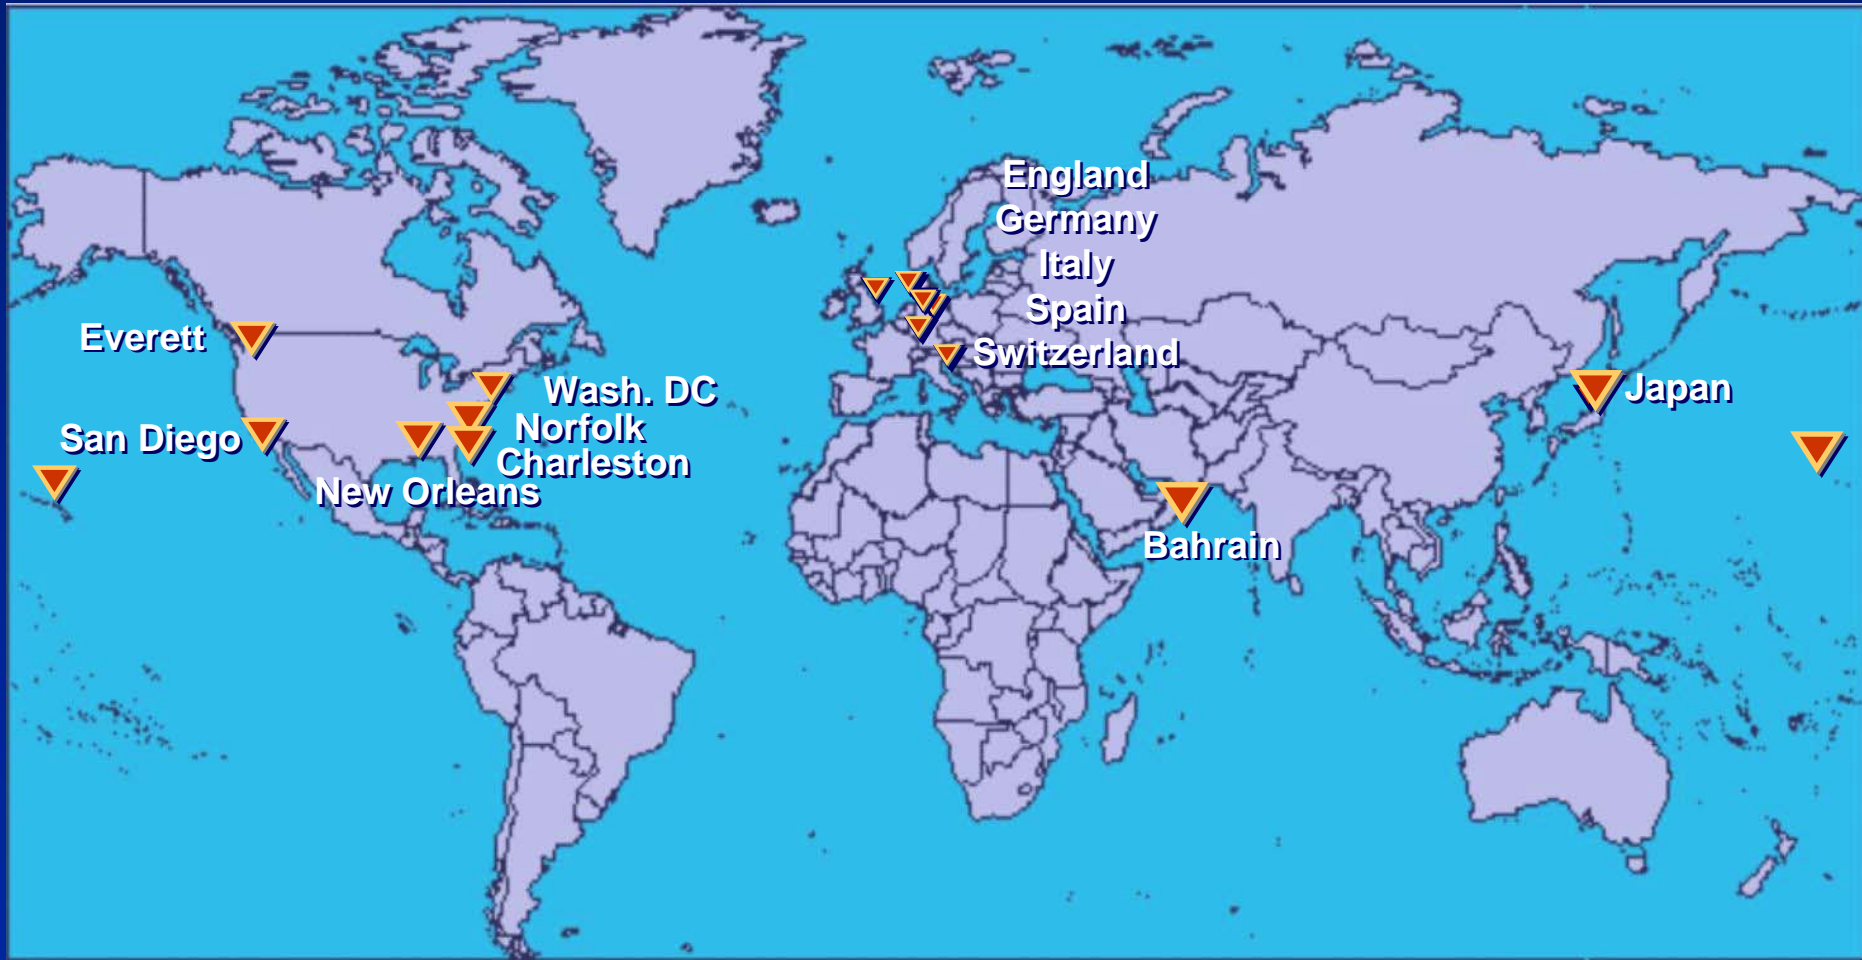

Deliver FORCEnet: Invent, acquire, develop, deliver and support integrated & interoperable C4ISR, business IT & space capabilities in the interest of national defense.

Commitment:

“We are dedicated to the Joint warfighters, who stand in harms way preserving our peace and defending our nation and its allies against aggression at home and abroad.”

TEAM SPAWAR

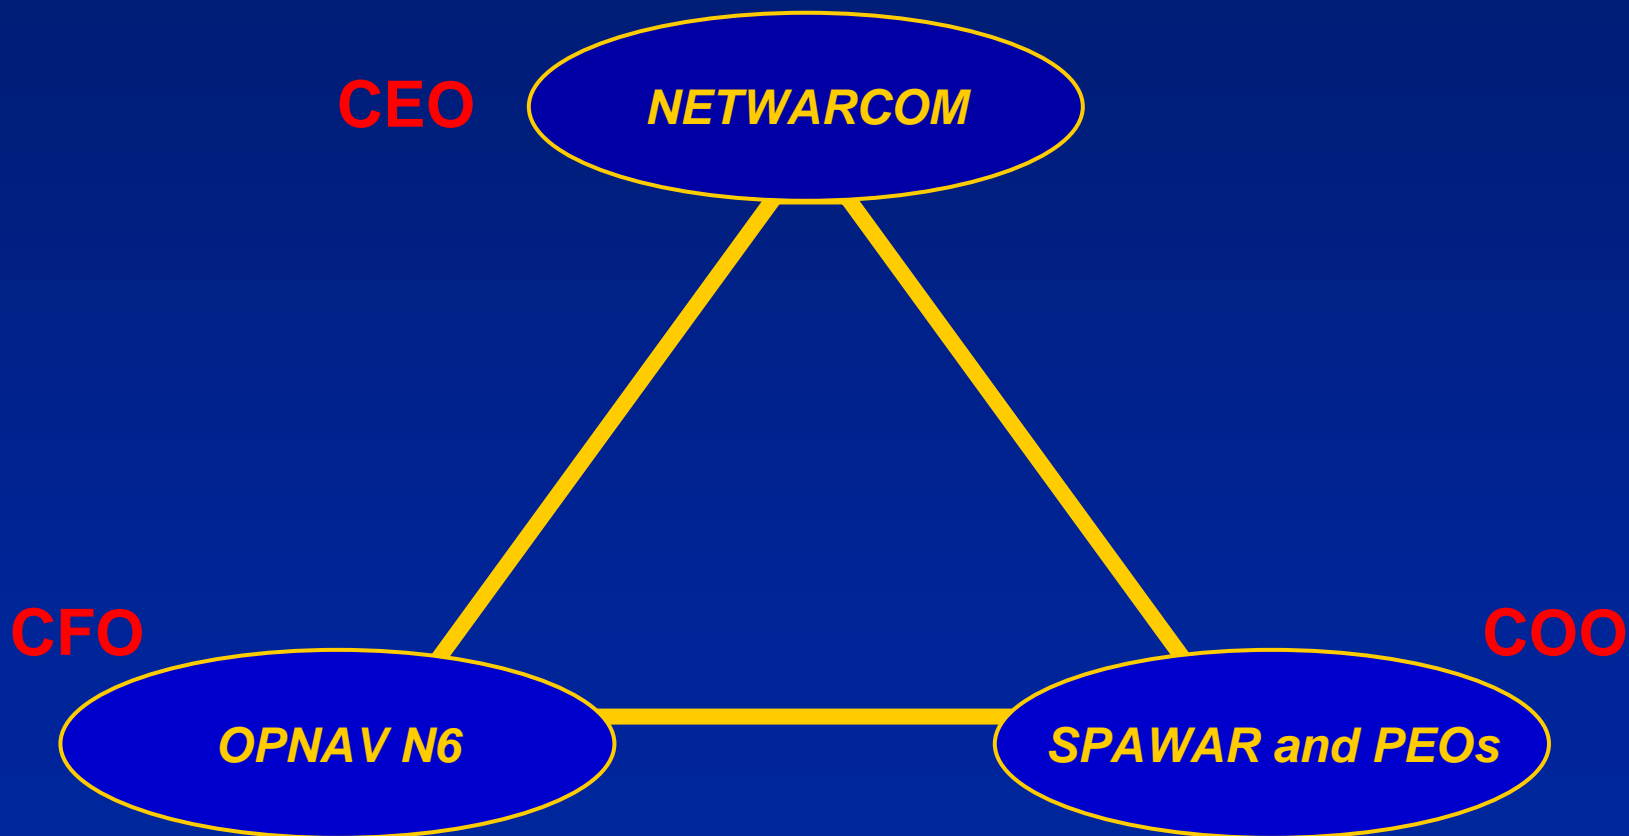

Naval NETWAR FORCEnet Enterprise (NNFE)

VISION: NETWAR/FORCEnet Enterprise is responsible for the implementation of FORCEnet. FORCEnet is the *operational construct* and *architectural framework* for naval warfare in the Information Age, *integrating warriors, sensors, databases, command and control, networks, platforms, combat systems and weapons into a networked, distributed combat force*. FORCEnet delivers effects-based operations that are *joint* and *coalition interoperable*.

FIRST YEAR SCOPE: NETWAR/FORCEnet Enterprise will focus on Command, Control, Communication, Computer, Combat Systems and Intelligence (C5I) systems and appropriate Business IT solutions integrating systems supporting the warfighting naval forces (deployed and ashore), while providing interoperability to the joint and coalition forces. Our near-term efforts will *tackle current readiness*, while looking to balance and fulfill long-term solutions.

NNFE Relationships
